Experience

Kalinga Spa - Co Founder, Lead Full Stack Developer | Kamias, Quezon City — June 2026 - Present

- Shipped the Go/PostgreSQL platform now running the whole business: **$35,800 revenue** over **2,212 bookings** and **4,385 service hours** since launch, at a **$10,000/month run rate.**
- Replaced spreadsheet payouts with automated commission splits, wallets, and payroll, reconciling **$13,500** in therapist earnings against **$22,400 profit** across 4,470 ledger records with **zero manual computation**.

Amplify - Founding Software Engineer — May 2026 - Present

- **Primary engineer** on the self-serve product that replaced the agency service: shipped the first version in **6 weeks** and wrote **76% of 4,800 commits**, automating the workflow 7 operators ran by hand so the business **scales without hiring**.
- Built **Mia, the in-app AI agent** that runs the product from chat: turns an idea, photo, or link into a finished post, remixes trends, replies to comments, and changes brand, calendar, and Autopilot settings in English, Hindi, and Hinglish.
- Shipped a remote **MCP server exposing 72 tools** for content, scheduling, creators, credits, and billing, with OAuth, per-user permissions, credit checks, and audit logs, so **external AI agents** can operate Amplify directly.
- Built **Autopilot**, which researches trends and generates and publishes posts without the user, gated by **LLM-judge reviewers** that check copy, plans, and likeness swaps before anything ships.

Nummeals - Software Engineer Intern — April 2026 - August 2026

- Automated rider routing across 33 riders and 27 delivery areas: 25 assignment rules replacing a manual spreadsheet, **603 reassignments** processed, preview and one-click rollback on every run.
- Shipped the rider delivery app across **38,773 stops** and 2,904 rider-days: offline stop list, proof-of-delivery photos, and idempotent replay so no stop double-posts on reconnect.
- Secured the operations console for **14 staff** over **11,414 orders** and **3,486 customers**: role-based permissions enforced at the database row level, across 42 API endpoints.

Amplify - Software Engineer Intern — February 2026 - May 2026

- Scaled the content engine to 120 accounts across 5 client brands: 8,647 posts in 30 days (288/day), **5.3M views**, 33,000+ followers, 162,000-view top post.
- Shipped Copy Photo, the platform's most-used feature: viral photo to on-brand persona shot in 2 minutes from 10, reclaiming **~1,150 operator hours monthly** and yielding 54 posts over 5,000 views.
- Automated compliance QA on all 8,647 monthly posts, cutting review from 5 minutes to 30 seconds and saving **~650 hours monthly** across 11 blocking prescription-medicine and ad-disclosure checks.

Laundry King MNL - Co Founder, Lead Full Stack Developer | Kamias, Quezon City — July 2025 - Present

- Solely architected, engineered and deployed a highly available RESTful API using **MERN with TypeScript**, integrating **AWS S3 for secure cloud storage** with **100% backend test coverage**.
- Enabled **$6,700+ in revenue** by implementing an efficient order management system for the **80+ weekly active user base**, supporting a total of **300+ customers.**

Freelance Full Stack Mobile & Web Developer. — January 2024 - Present

- Moss Manila: **AI & Real-Time Architecture:** Engineered a **MERN**-based collaboration platform using **Socket.IO** for low-latency team messaging and a **Node.js/Express AI matching engine** with **vector-based semantic search** to reduce project specification time by 25%.
- Baobab Vision: **Computer Vision Integration:** Built a **Flutter** mobile application leveraging **Google ML Kit** for **real-time face shape analysis** and **OpenAI** for generating context-aware, personalized eyewear recommendations.

Projects

Uxie - Full Stack Developer | Codex × UX+AI Hackathon — October 2026

- **AI Usability Agents:** Built an AI usability preflight that sends up to **five simulated visitors**, each an AI agent in a **real browser with real limits** (200% zoom, touch-only phone, keyboard and screen reader only), to complete one goal

and return a score, top fixes, and a ready-to-paste fix prompt per issue.

- **1st Place Overall:** Won the Codex × UX+AI Hackathon in BGC with a team of 4, going from idea to working product in **6 hours** with OpenAI Codex, writing 75% of the commits (Next.js, Hono, Playwright).

AInay & MedicAI - Team Lead, Full Stack Developer | Ship or Be Shipped Philippines December 2025

- **AI Health Products:** AInay is an AI medication companion for seniors and caregivers that identifies medicines against the **Philippine FDA registry**, flags **drug-drug and drug-food interactions**, and reads a daily spoken briefing; MedicAI is an AI clinical documentation assistant.
- **Leadership & Dual-Award Delivery:** Led a 3-man team to secure **3rd Place Overall** for AInay and the **Clinical Assistant Bounty** for MedicAI among 80+ developers under 24 hours, delivering production-ready MVPs that targets to address 76% medication non-adherence rate for Filipino families.

Education

Polytechnic University of the Philippines Sta. Mesa**,** Manila, Philippines
Bachelor of Science in Computer Science 2024 – Present
SM Foundation Scholar
Relevant Coursework: Object Oriented Programming, Data Structure and Algorithms

Polytechnic University of the Philippines – Senior High School Sta. Mesa**,** Manila, Philippines
Information and Communications Technology Strand - Graduated with High Honors 2022 - 2024

Technical Skills

Languages: JavaScript, Typescript, Python, Golang, C, C++, Java, SQL, HTML, CSS
Framework: React, Tailwind, Node.js, Express.js, FastAPI, Chi
Developer Tools: Git, Github, Bash, Visual Studio Code, Postman
Cloud & Infrastructure: AWS (S3, Lambda, EC2), Docker, Supabase, Firebase, Render, Vercel, Netlify
AI & Agents: Gemini, OpenAI, MCP, LLM-as-judge evaluation, pgvector embeddings
